

Data Center & Managed Services

Basis Overview

- Founded in 2004
- Hosting, Email & Applications and Cloud Hosting
- Dedicated Managed and Unmanaged Solutions

Focus

- Managed services and hosting are not add-on services - it's all we do!

Infrastructure

New 5,300 square ft data center facility located in Reykjavik, Iceland.

- Dual/diverse fiber access
- 2 cooling systems (N+1)
- Primary and secondary power feeds to the rack via diverse PDUs
- UPS
- On-site diesel back up
- Uniflair free cooling chiller for lowest possible TCO
- Designed and run according to ISO and PCI standards
- Staging and loading area

Service Options

Physical hosting options

- Cage (min 5 racks)
- Lockable 42u cabinet
- Secure 24x7 access
- Managed Installations
- Smart hands services
- Comprehensive 24x365 monitoring and management options

Industry Leadership

- Cisco Powered Core Network
- Fortinet Silver Partner
- Microsoft Certified Silver Partner
- Red Hat Certified Partner

Flexibility

- Built to handle highly-customized hosting environments
- We adjust to customer needs quickly and efficiently
- We manage equipment in our data center, at customer premise, and in third party data centers in the United States and UK.

The Icelandic Advantage

- Reliable & stable power infrastructure ranked #1 in the world (IMD)
- Power is **100% sustainable**, coming from hydroelectric and geothermal sources
- Lower risk for natural disaster than the U.S., U.K., and India—Despite headline grabbing volcanoes!
 - ZERO infrastructure outages due to natural disasters in the past decade.
- Authorized dealers and In-country inventory for data center equipment: Cisco, Dell, HP, IBM, and more. Overnight delivery from distributors in Europe.
- Strategic location—closer than you think. 18 MS to London. 36 MS to New York.
- Naturally cool air temperatures leveraged using free cooling means low OPEX
